Home-based neurorehab systems can increase engagement for stroke survivors.

**Why this matters*: A decentralized trial showed high engagement and improvements in mobility measures for chronic stroke survivors using a home-based system.*

Massage therapy improves pain and function in knee osteoarthritis.

**Why this matters*: A 12-week massage RCT found greater improvements in pain and function, and reduced muscle co-contraction in medial knee OA patients compared to education.*

SIGNAL 80

Aging Clin Exp Res

Multimorbidity and training adherence predict better outcomes in older adults.

**Why this matters*: In older adults undergoing training, multimorbidity, younger age, lower BMI, and higher resistance training adherence predicted better responses.*
